

Thomson Reuters Electronic Trading

In today's evolving FX markets, banks need flexible trading platforms and tools that provide control over electronic pricing, distribution and hedging to meet the growing demands of their client base and improve internal efficiency through automation.

With Thomson Reuters Electronic Trading, over 180 banks across 57 countries globally are already benefiting from a turnkey, next-generation eFX trading platform.

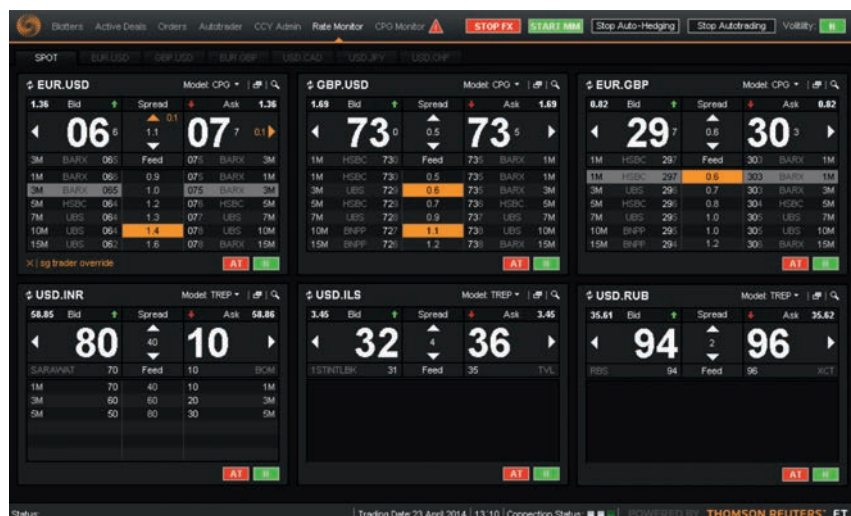

Part of the Thomson Reuters premium desktop trading service, Electronic Trading offers a powerful suite of e-commerce products to shape, configure and automate FX prices to customers while streamlining risk management.

FX Trading. Answers, Advanced.

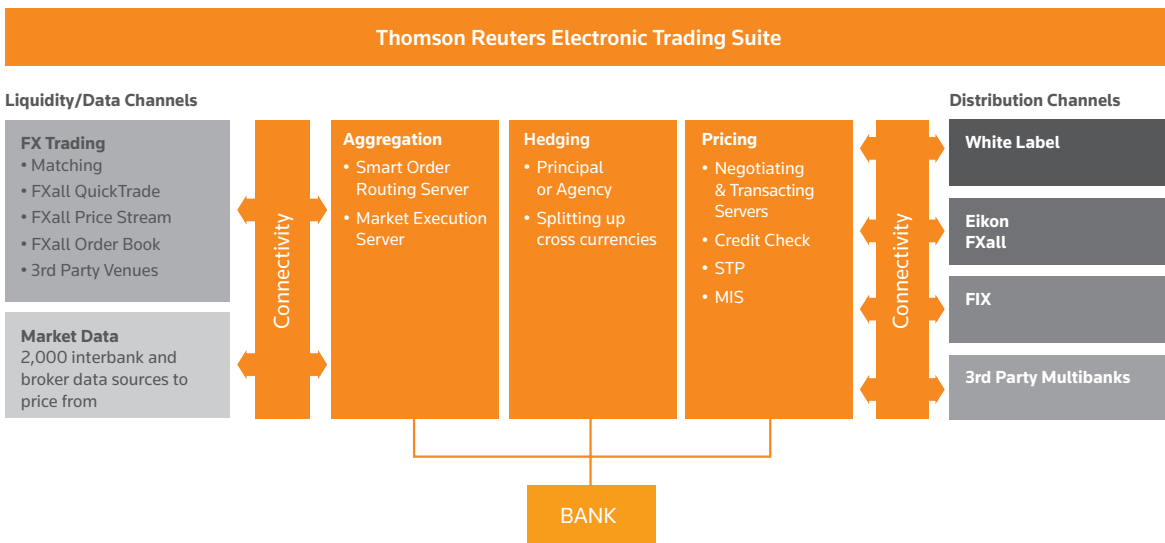

Key Benefits:

Take advantage of a fully hosted and supported eFX white-label solution that lets you price direct to clients through a variety of distribution channels while maintaining your brand presence. A wide range of upgrade options is available for expansion.

- Satisfy your own choice in market making models with advanced aggregation and smart order routing logic for agency, risk and warehouse based execution.
- Assume greater control in execution with immediate access to built-in liquidity from Thomson Reuters venues including managed relationship and anonymous. Reduce latency with co-location between electronic trading and Thomson Reuters venues in either NY or London. Alternatively, drive customer pricing using internally created trader rates.
- Intuitively analyse and understand customer behavior, trends and profitability with business intelligence MIS tools in HTML5.
- Effectively manage, monitor and run multiple types of customer resting orders with built-in order management capabilities.
- Streamline your workflow with a comprehensive end-to-end solution that delivers market-leading compliance, regulatory, counter party limit risk, straight-through processing (STP), confirmations, settlement and trade history reports.

Thomson Reuters FX Trading Application
