THOMSON REUTERS INDICES

APRIL 2018

## DESCRIPTION

The Thomson Reuters – MCX India Commodity Indices (iCOMDEX) are based on commodity futures listed on Multi Commodity Exchange of India (MCX). iCOMDEX comprises of a composite, sector based and single commodity indices available in excess returns forms. The indices are developed by MCX and validated and governed by Thomson Reuters. For its calculation and methodology, the indices follow the recommendations of the International Organisation of Securities Commissions (IOSCO) guidelines for benchmarks. The indices are designed to provide a transparent and objective view of the Indian commodity markets and can be used as benchmarks for tracking commodity price movements and an indicator of the overall commodity market trend.

Market participants including corporates, individual traders and financial institutions such as hedge funds, exchange traded funds and mutual funds can use iCOMDEX indices either as a reference benchmark for performance of Indian commodity markets or as the basis of investment products to provide direct exposure to Indian commodities.
